

Design: Michel Boucquillon e Donia Maaoui

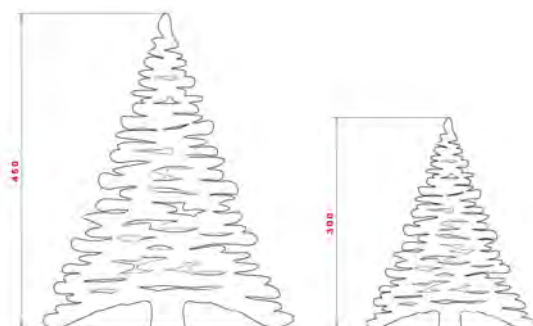

Product description

Designed by Michel Boucquillon and Donia Maaoui, the "Bark" collection was inaugurated in 2015 with the namesake centrepiece. The designers drew their inspiration from their home, Casa Boucquillon: it is a place for experimentation, meditation and work where they can live in synch with nature. The perforated pattern of the "Bark" range recalls the bark on the trees that surround the house. The result is a strongly poetic collection where every individual object proves to be, either in shape or in function, in continuous and harmonious dialogue with nature.

With the "Bark for Christmas" tree, the "Bark" collection heralds the advent of Christmas: an original decoration to create a special festive atmosphere and bring all the magic of Christmas into the home. The decoration is now available in a smaller size, standing 30 cm tall, designed to fit easily into any space.

Caratteristiche / Suggerimenti d'uso.

- Produced at the factory in Crusinallo, Omegna, the "Bark for Christmas" tree, like the other items in this collection, demonstrates Alessi's skill in processing steel
- "Bark for Christmas" is produced with a cutting and laser perforating process on the steel sheet, which is subsequently shaped
- Available in two colour versions: polished steel or red-painted steel
- Offered as a set comprising a steel tree and seven magnetic decorations produced in glass with a polished finish. The decorations kit includes a gold shooting star and six porcelain baubles in three different colours: gold, silver and red.
- The magnetic decorations can be used to adorn and personalise the tree with photographs, Christmas cards or other items, turning "Bark for Christmas" into a poetic repository for cherishing precious souvenirs and memories
- Perfectly stable, thanks to the large oval base designed to accommodate a tealight or small Christmas decorations
- A small Christmas tree that can be placed near a wall or in front of a window, creating a magical, truly special corner
- Thanks to its small size, the object can also be used to decorate the table or a bedside table
- This is an object with highly expressive design which enhances any room where it is displayed
- Ideal for those who still cherish the ritual of decorating the home for the festive season: an object that creates a special atmosphere, even without a traditional Christmas tree
- We recommend you clean the steel surface of the item with a soft cloth and non-abrasive detergent
