THE PLEATED SCULPTURE

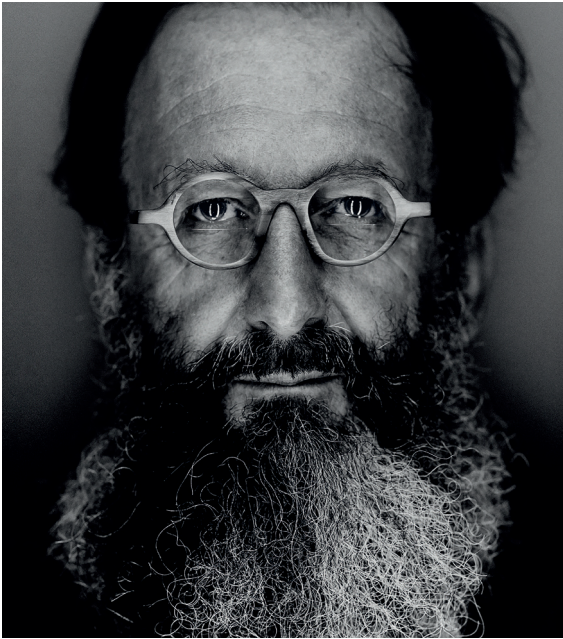

The popular Toaster from the Plissé collection, designed for Alessi by Michele De Lucchi, gets even bigger: as a way of enjoying time with your nearest and dearest, of surrounding yourself with beauty and poetry throughout the day.

DEDICATED TO

To lovers of design and sculptural forms that will enrich their domestic landscape. A powerful ally for preparing and enjoying a tasty lunch, brunch or breakfast with friends or family.

DESIGNER

Born in 1951, **Michele De Lucchi** is a prominent figure on the Italian architecture and design scene, rising to international acclaim in his field in the mid '80s. De Lucchi's research is constantly evolving: from architecture to product design, from academia to consulting on coordinated corporate identities. For Alessi, he has designed instantly iconic items like the Pulcina espresso coffee maker and the Plissé collection of small kitchen appliances.

“With the skilful and creative use of pleating, fashion designers shape fabrics and create clothes like sculptural works of art. Plissé is shaped starting from a pleated sheet of paper and crafted by Alessi like a beautiful sartorial creation. The folds give form to the shape, they sculpt it, they structure it, because a form without folds is only a volume without form. The pleats transform simple two-dimensional sheets into three-dimensional objects.” ♦ Michele De Lucchi

COMPONENTS

Thermoplastic resin body with a power indicator light, toasting adjustment knob, lifting lever, CANCEL, DEFROAST and BAGEL buttons, and a crumb tray. Finished off with a brioche warming rack in 18/10 stainless steel and thermoplastic resin.

DESIGN NOTES

Large

The elongated double compartment allows up to four slices of bread to be toasted at the same time. Ideal for simultaneously preparing a breakfast or snack to share with family or friends.

A new accessory

The brioche warmer can be used to keep toasted slices of bread warm, or to warm up croissants, pizzas or other baked goods.

Functional

Up to 6 levels of browning, for sweet and savoury dishes at the touch of a button.

SUSTAINABILITY AND SAFETY

- ♦ Tested and certified to guarantee consumer safety.
- ♦ A non-slip base ensures stability and enables safe use.
- ♦ WEEE marking inside package.

USE AND MAINTENANCE

[Simple to use] - Allows 6 different browning levels, easily controlled via the browning knob. A Heating Function brings the bread to the desired temperature.

- Equipped with: a defrost function, which defrosts the bread before starting the browning process; a bagel function, which allows only one side of the bread to be heated and a stop function, which activates the automatic ejection of the bread.
- The cable is integrated: it can be rewound under the base of the toaster after use.

[Easy to clean] The crumb tray is easily removed with a “drawer” movement. Clean the outer surface with a damp cloth and dry thoroughly.

[Easy maintenance] In the event of wear, loss or damage, the following spare parts may be purchased from your trusted Alessi dealer: crumb tray and brioche warmer.

CODES AND VARIANTS
