PLISSÉ ON-THE-GO

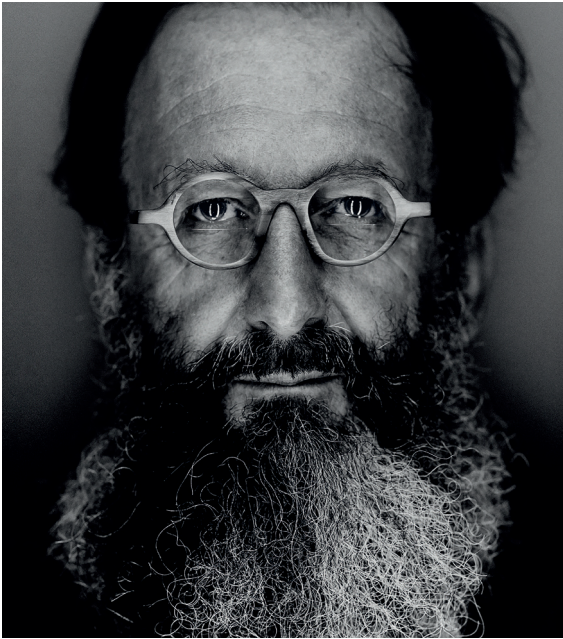

The iconic Plissé collection, designed by Michele De Lucchi for Alessi, is enriched with a new item: the personal blender. In a skilful combination of volumes and transparencies, the designer gives us a device with superior functional and aesthetic features, so you never have to do without your favourite drink, enjoying it at home, at work or even on-the-go.

DEDICATED TO

For lovers of design, smoothies and cool drinks. For those who want a powerful ally to complement their healthy routine.

DESIGNER

Born in 1951, **Michele De Lucchi** has been a leading figure on the Italian architecture and design scene, and has also conquered the international scene since the mid-1980s. De Lucchi's work is constantly evolving: from architecture to product design, from academic work to corporate image consultancy. For Alessi he has designed objects with an immediately iconic design such as the Pulcina coffee maker and the Plissé series of domestic appliances.

“With the skilful and creative use of pleating, fashion designers shape fabrics and create clothes like sculptural works of art. Plissé is shaped starting from a pleated sheet of paper and crafted by Alessi like a beautiful sartorial creation. The folds give form to the shape, they sculpt it, they structure it, because a form without folds is only a volume without form. The pleats transform simple two-dimensional sheets into three-dimensional objects.” ♦ Michele De Lucchi

COMPONENTS

Thermoplastic resin body with power cord and ON/OFF button. Stainless steel blade unit. Small, 120 ml graduated scale PCTG container and tall, 550 ml graduated scale PCTG container. ABS lid with spout.

DESIGN NOTES

Elegant practicality

The pleating designed by Michele De Lucchi imparts different textures to different materials and gives this device an innate elegance.

A personal accessory

An original and sophisticated design, to incorporate into the domestic landscape or flaunt as an elegant personal accessory.

SUSTAINABILITY AND SAFETY

- ◆ Tested and certified to guarantee consumer safety.
- ◆ A non-slip base ensures stability and enables safe use.
- ◆ WEEE and warranty included in the package.
- ◆ The plastic elements that come into contact with food are BPA-free.

USE AND MAINTENANCE

[Easy to use] Place the food in the chosen container and screw the blade unit in place, then turn the container upside down and fit it into the housing on the motor body. Press the ON/OFF button and keep it pressed until the food is completely blended. After preparation is complete, the container can be used to transport the drink thanks to the spout cap equipped with a practical sealing system.

[On-the-go] The lid with spout, which has a practical sealing system, makes transport safe and allows the container to be opened easily with one hand.

[Versatile] The two different sized containers allow for different preparations: the larger one is ideal for smoothies and drinks, the smaller one for preparing tasty toppings and condiments.

[Easy to clean] Wash the blade unit, the two containers and the spout lid by hand with warm water and washing up liquid; these items are not dishwasher safe. Clean the motor body and power cord with a damp cloth and dry thoroughly.

[Easy maintenance] In the event of wear, loss or damage, the following spare parts may be purchased from your trusted Alessi dealer: blade unit, tall container, small container and lid with spout.

CODES AND VARIANTS
