Cold chicness

The Tending Box ice bucket once again incorporates many of the same features as the other items in the collection, reinterpreting the most classical types of mixology in a perfect blend of form and function. Made from 18/10 stainless steel with a thermoplastic resin handle, it combines strength and comfort in an object of impeccable appearance. It features double-walled construction for optimum insulation, while at the same time making the product lightweight and manageable. The folding handle, the authentic signature of the

designer, makes the design minimalist and innovative. The knob, inspired by 19th-century models and also featured in the shaker from the same series, returns on the lid of the ice bucket, which the tongs clip onto.

THE TENDING BOX, ICE BUCKET
DESIGN BY GIULIO IACCHETTI

DEDICATED TO

Designed for both those who make mixology an art form and those who are just starting to discover it: a tool which combines form, function and ease of use.

Giulio Iacchetti

BIO

An industrial designer since 1992, Giulio Iacchetti works for various Italian and international brands. Among the distinctive features of his work is the search for new types of objects such as the Moscardino designed with Matteo Ragni, awarded the Compasso d'Oro in 2001. In 2009 he received the Premio dei Premi for innovation from the President of the Italian Republic and in 2014 he won a second Compasso d'Oro for a series of manhole covers designed with Matteo Ragni. For Alessi he has designed products that have been immediately appreciated by the public, such as the Noè series of objects dedicated to wine.

QUOTE

"The ice bucket features a soft, conical shape which rests delicately on the counter. The lid features an imposing, rounded knob which almost invites you to grip it. The tongs are conveniently housed on the lid. The incorporated handle makes the object easily portable: when not in use, the handle perfectly integrates into the volume of the bucket. Its compact and iconic shape, and the characteristic design of the knob, represent elements firmly in common with The Tending Box collection, which is completed with this new ice bucket." Giulio Iacchetti

DESIGN NOTES

Tradition renewed

The double-walled ice bucket from The Tending Box family is a tool with professional features, developed following in-depth analysis into the typology and its uses.

Cozy size

The folding handle is the distinctive signature of the the designer, who creates objects with balanced proportions and elegant lines. Familiar and at the same time innovative, the ice bucket by Giulio Iacchetti is the perfect accompaniment for everything from the most formal cocktails to an aperitif among friends.

USE AND MAINTENANCE

EASY TO USE

The tongs, which clip onto the lid, lock it in place when not in use and must be removed before it can be lifted.

EASY TO CLEAN

Can be washed in the dishwasher; do not use scouring pads or powders which could damage the surface.

PACKAGING

Packaging made from environmentally friendly recycled cardboard.
